

SPECTRUM CHEMICALS LTD
QUALITY MANAGEMENT SYSTEMS MANUAL

Quality Policy

The Quality Assurance Manual is a statement of the Quality Assurance policies and philosophies of Spectrum Chemicals Ltd.

It is the policy of Spectrum Chemicals Ltd to supply products that meet or exceed our customer's initial and continuing expectations of Quality and service. To this end the Company's Quality Management system has been structured to encompass all aspects of the Company's activities including such areas as Sales, Purchasing and Customer Service.

The Framework used to establish and review the objectives will be conducted using the 'SMART' principals (Specific, Measurable, Achievable, Relevant and within a Timescale).

This manual is supported by detailed operational documentation. These, as required relate to codes of practice, technical specifications, work instructions, inspection and test instructions and other relevant documentation to form a working set of documents governing the required work practices throughout the Company.

All employees shall be trained to understand and discharge their individual responsibilities to ensure the effective operation of the Quality Management System.

This policy is available to all Stakeholders upon request.

The Quality Assurance Management System is structured to meet or exceed the requirements defined within the **applicable version of the following:**

ISO 9001

The following signatories endorse the above Quality Policy Statement:

Ian Mackridge Operations Director	Sarah Campbell Office Manager
